

Australia Visa Photo Specifications

Two passport-sized photograph (please attach to the form). NB - ID photos that have been digitally enhanced or altered to improve or change appearance or remove distinguishing features are not acceptable. As the photos are required for identity purposes, if they do not represent your true appearance, your visa application may be delayed if you need to be asked to provide new photos. The photos should also meet normal passport size and pose (front on head and shoulders, no facial coverings or sunglasses).
